Tough on Inks & Adhesives Safe For You & The Environment

OXYGEN' is a natural, non-toxic cleaning product that rinses away with water. Most other Dry-Erase Markerboard cleaners on the market are harsh, and even dangerous, to users and the environment. But, OXYGEN Dry-Erase Markerboard Restorer contains no hazardous ingredients.

OXYGEN Dry-Erase Markerboard Restorer is . . .

Safe

- 100% all natural ingredients
- Environmentally friendly
- Non-toxic
- No caustic fumes
- Biodegradable
- Non flammable
- Non abrasive

Non-toxic, Environmentally Friendly cleaner for Whiteboards and Markerboards.

Easy to Use . . .

1. Shake contents for at least 30 seconds before application and occasionally during application.
2. Apply a light to moderate mist in a small test area first to judge application rate, time, and suitability.
3. Allow about 30 seconds for the cleaner to work. For tough stains reapply and allow more time, wipe the treated surface with a soft cloth or paper toweling.
4. OXYGEN contains natural oil and can leave a slight film, if film exists use a damp cloth and a mild soap to remove the film.
5. Properly dispose of all toweling or cloths used in the removal of the marker.

Finally, a safe, environmentally friendly, **non-toxic solution** to make your whiteboard or markerboard look like new!
